

# BIOHACKING LAB WITH NFT SHARING DATA

# Problem Statements

---

- 1** **Doctors** want to do a lot of different assays in their office  
But not one platform for storing data
- 2** **Users would like** have access for all  
measurement for whole life (a lot of GDPR  
problems). There are not any health wallet
- 3** **Users cannot** sell data to pharma or  
another organization for get tokens.
- 4** **3<sup>rd</sup> party companies** (e. t. Insurance) want  
easy solution for anonymous data sharing

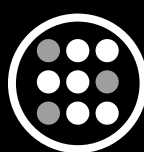

# System components

## 01. DX365 READER

Assay Reader for professional and home usage

## 02. DX365 STUDIO

For LFT Developers & manufacturers

- Adaptation new test to system
- QoC test, calibration, validation
- Exporting result for regulatory

## 03. DX365 CARE DESKTOP

For PoC and non-professional

- Connect to device
- Run and read test
- Result visualization
- Exporting to CSV, PDF or NFT\*
- Marketplace existing/new test

## 04. DX365 CARE MOBILE

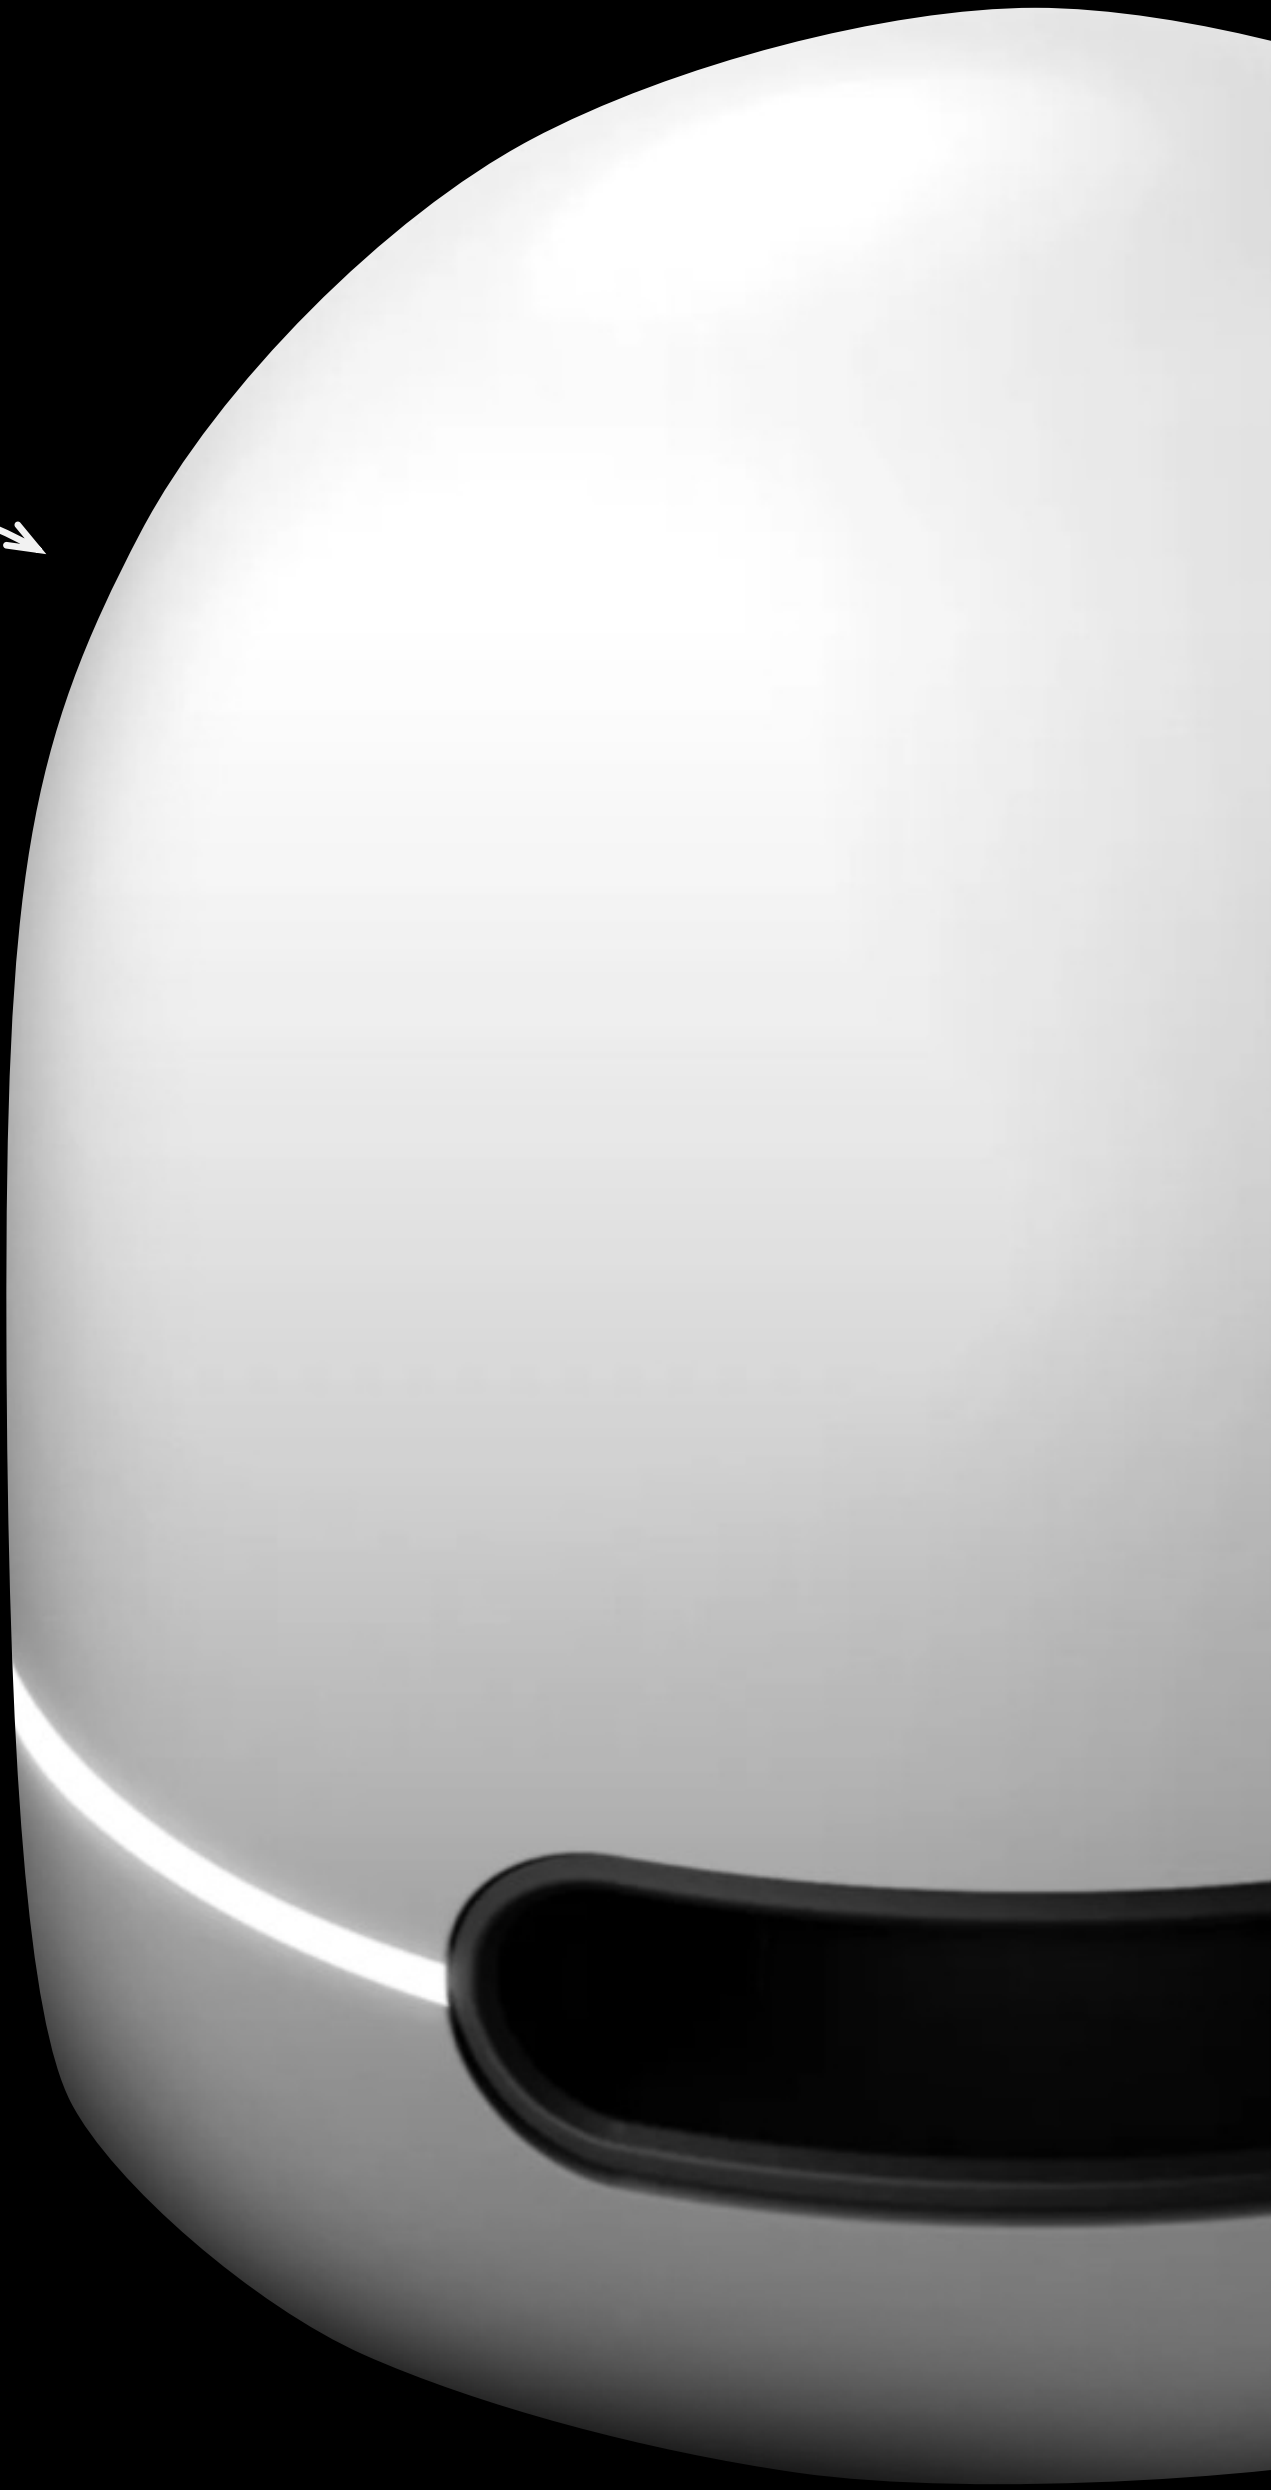

For PoC and non-professional

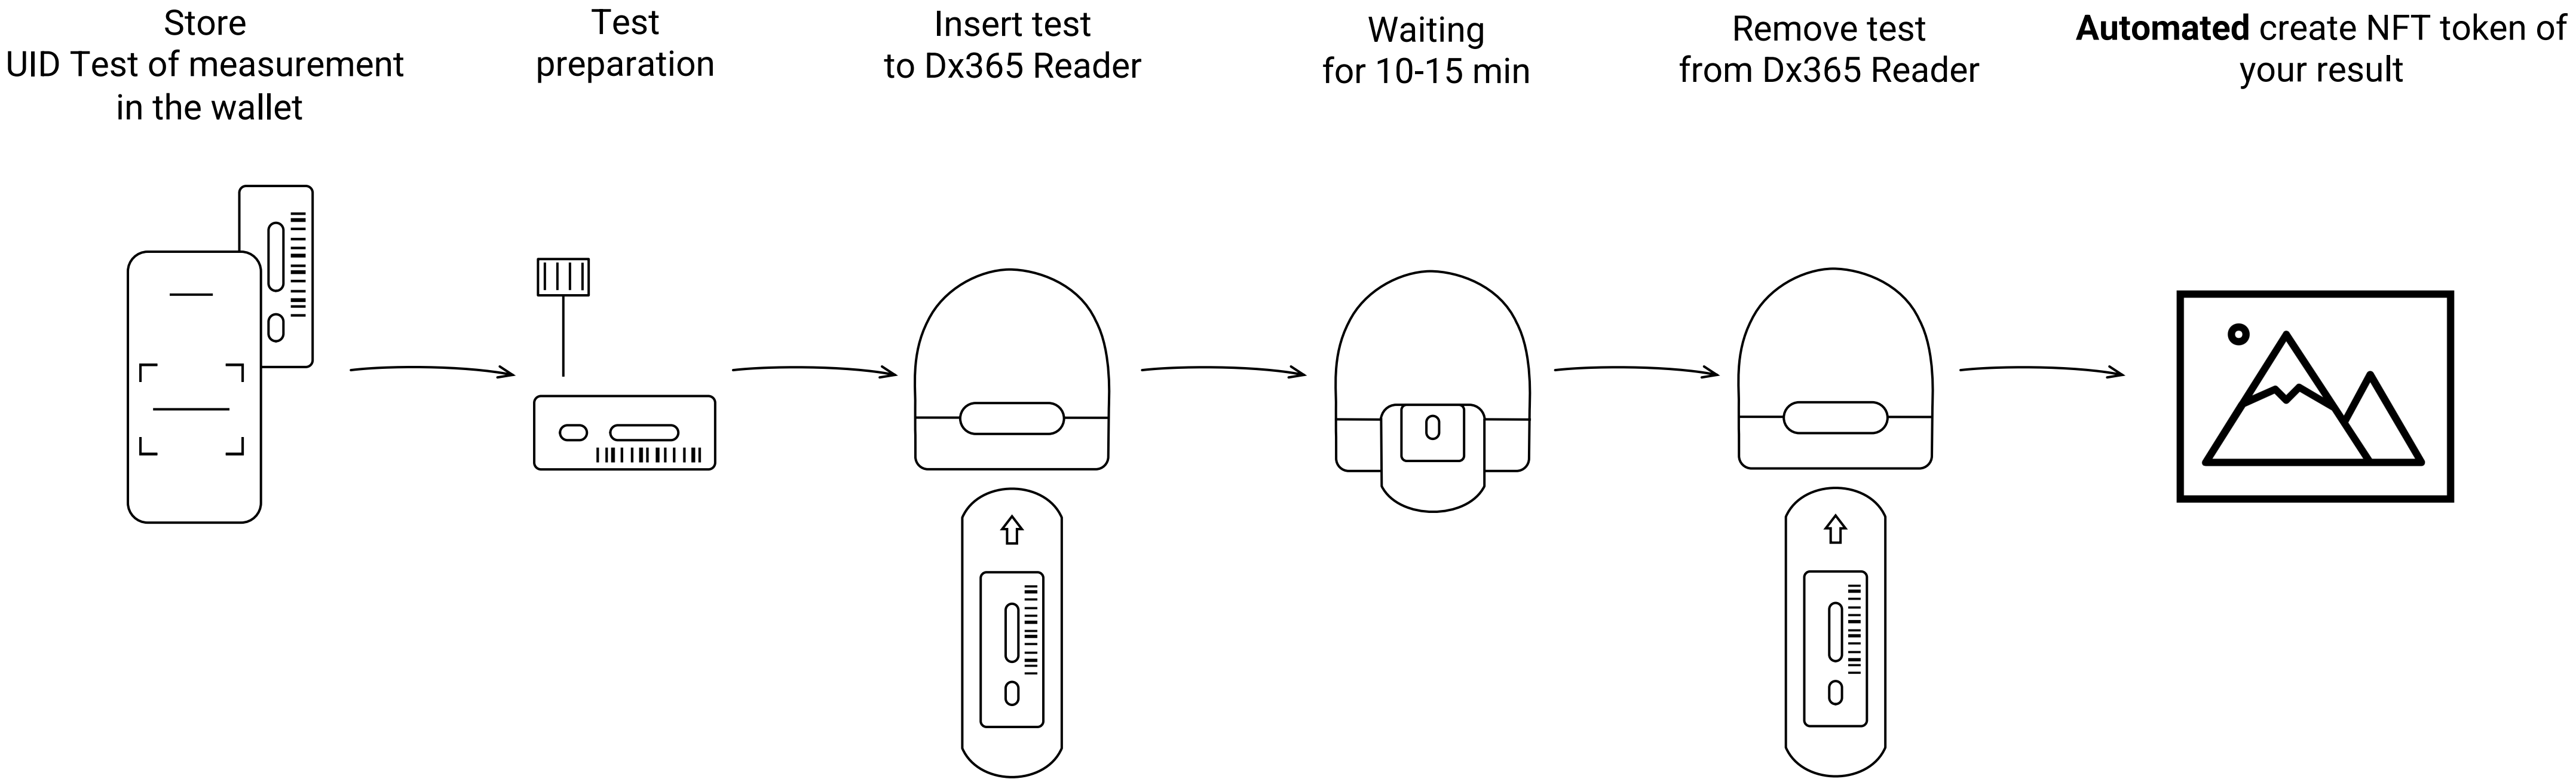

## 05. DX365 CLOUD

For test metadata distribution

- Distrubution metadata
- Store new test data
- Log/results collection
- Statistics information

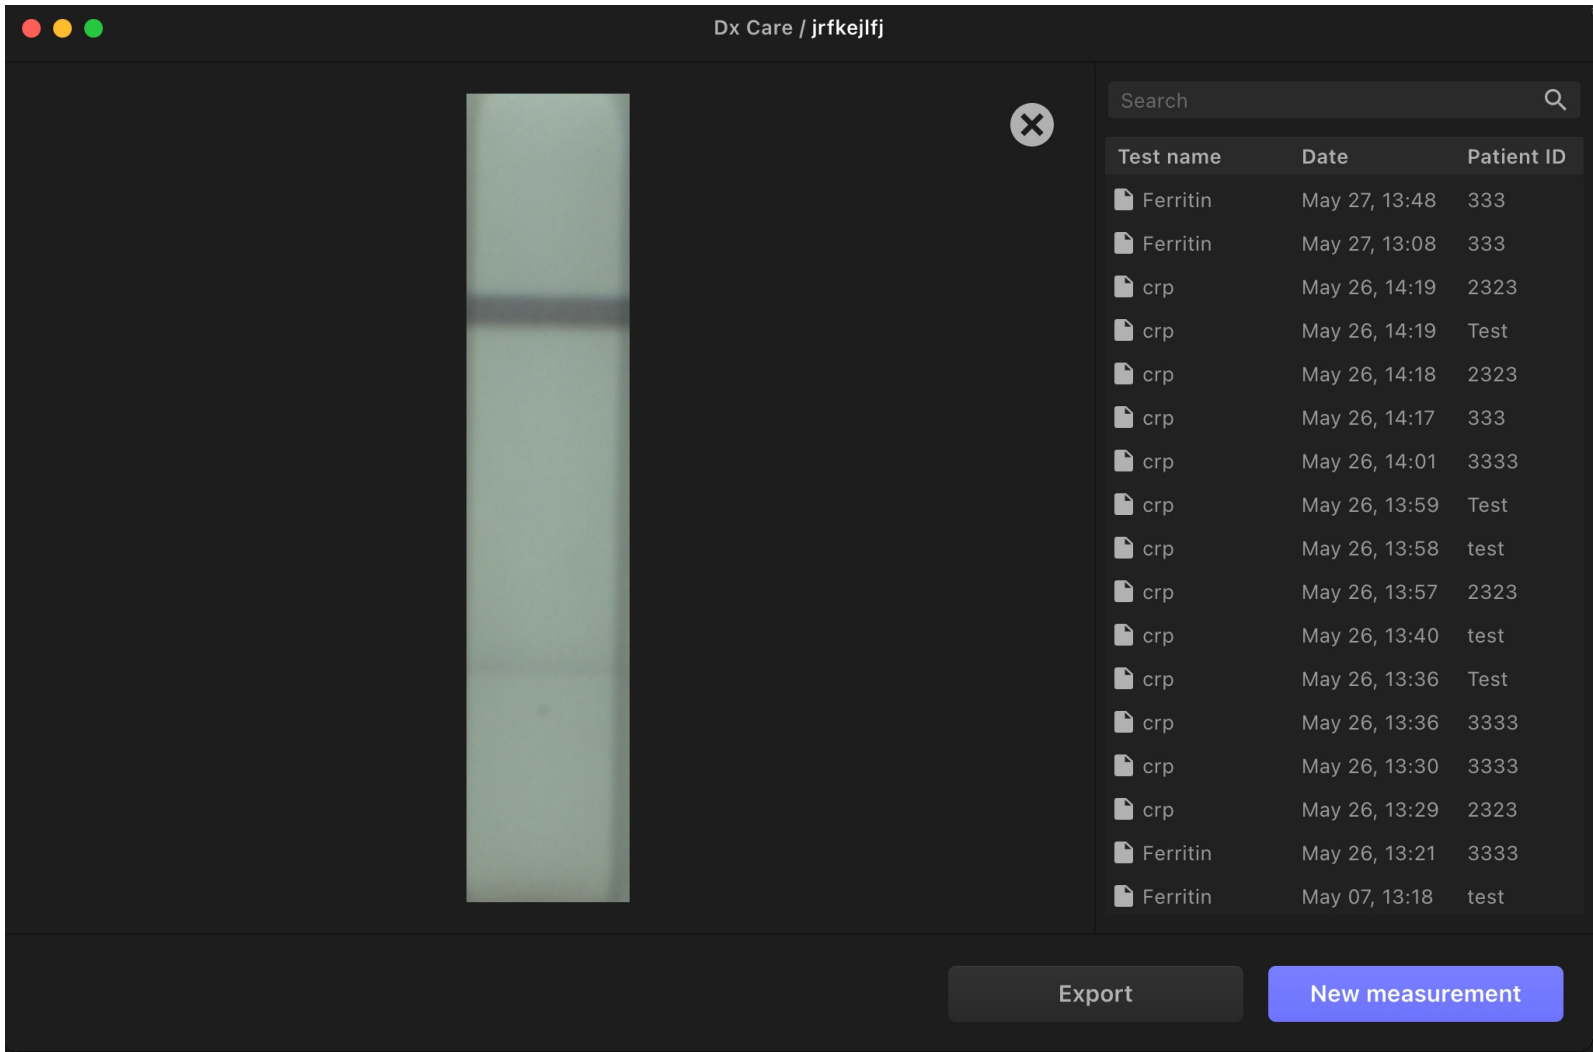

# Fully anonymous Testing Procedure

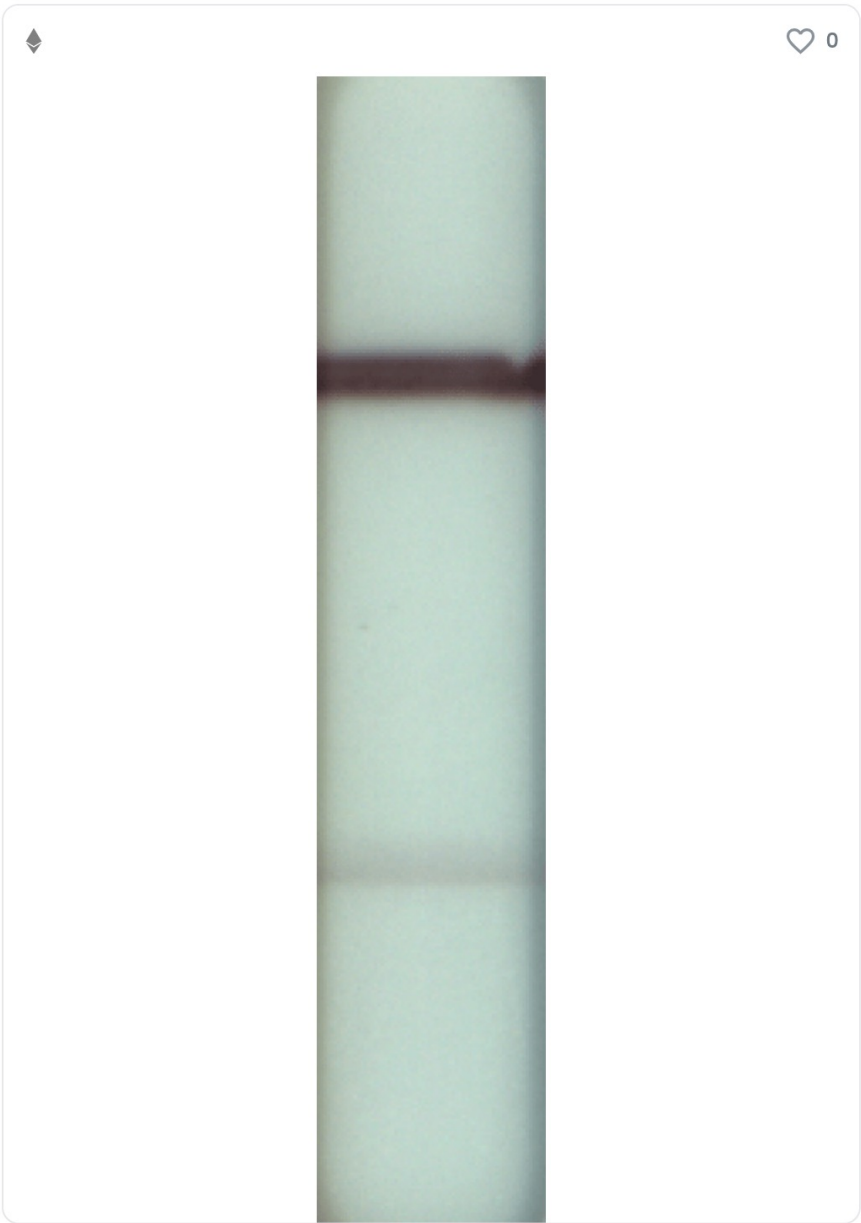

**\*Wallet just store test UID**

# Result of create NFT from Dx Care

NFT create & send to wallet

### Description

Created by [you](#)  
Biohacking lab test

### Properties

CONCETRATION

59.1

New trait

TEST TYPE

Ferritin

New trait

UNITS

Ng/mL

New trait

REFERENCE RANGE

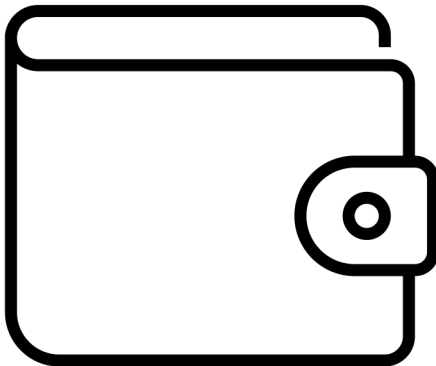

20-150

New trait

Next steps

+ Health wallet

+ Market place of test result
